## COLOR TREND 2016

Boysen reveals **Color Trend 2016**, comprising four different palettes which represent the spirit of the times. The unifying philosophy that runs through the four sets of colors is Mother Earth and humankind's relationship with her.

### RECHARGE

This exuberant and reinvigorating palette is made up of the different shades of blue — Bubbly Brook, Enchanted River and Stargaze, spiced up with the dazzling orange Weekender.

### RENEW

Repurposing of old things is now espoused by a growing number of people as part of their sustainability effort. Transform spaces and freshen it up with Hello Yellow, the greens Tree Hugger and Cabin Moss, and Renewed White.

### RECREATE

This is a sophisticated palette that reflects the patterns and textures of nature with the grays Grayson Borough and Abstract Solace, the coppery tones of Vintage Cigar and Classic Quartz, and two shades that boost up the excitement level of this palette, the yellow gleam of Golden Nugget and the red intensity of Saffron Burst.

### REALM

Reminiscent of a supernova in terms of incandescence is Realm with its celestial purple Imperial Force, the frisson of Star Princess pink, the intensity of Dune Buggy orange, and the brilliance of Tribute Yellow.

We have added complementary colors to each palette derived from Color Series, Boysen's most popular colors, tried and tested through the years, so you have more colors to play with.

Color Trend 2016 has come about after an extensive and rigorous process set by Nova Paint Club, an international organization of leading paint companies from Europe, Asia, North America and South America, of which Boysen is a member.

## RECHARGE

The inspiration for this palette is people's longing to plug into nature and recharge, absorb raw, pure energy, breathe 100% fresh air in the hopes of coming back to the arena at an optimal level to survive another bout. The restful blues of sky and sea is invigorated with a pop of orange.

## RENEW

The light, fresh colors of this palette is for earth lovers, who advocate for the protection of natural resources and ecosystems. Whether it is a patronage of organic products or an appreciation of artisanal goods, a recycling of materials or upcycling to come up with objects of better quality or value, the mindset is clearly environmentalism.

## REALM

A silent revolution of awakening is happening in our planet today, of earth warriors who realize that we can save our world if we think of ourselves as one and not divided by man-made constructs. With its visionary purple, dreamy pink, the light of yellow and the energy of orange, this is a palette for the "practical dreamer" whose feet are on the ground, certain that the way forward in building a better world for all of us starts with himself.
